

ENVIROMENT MANAGEMENT SYSTEM POLICY

Telit Power doo is committed to achieving environmental policy. We have created an environmental policy, that applies to all of our locations. With this policy, we set directions of activities related to environmental protection.

The establishment, maintenance and continuous improvement of the system of environmental management, according to the requirements of ISO 14001: 2015, is guaranteed that all business processes are guided by the principles of sustainability and long-term care for the environment, with minimal use of the natural resources and pollution prevention. The establishment, maintenance and continual improvement of the system of environmental management according to legal and other requirements which our organization accepted..

Education and continuous information of the employees in order to link their activities with the environment, and to realize the importance of that link are our priority commitments.

To convince each employee that his contribution to the activities on the recognition of the possible influence of the work processes on the environment and their systematic monitoring and control, with the continuous development of processes and working conditions in order to protect the environment, immeasurably significant and large is the activity which the management Telit Power Ltd. has put himself in the task in order to establish the general and specific objectives of environmental protection. Telit Power doo ensures continuous improvements in order to protect the environment and sustainable development organizations..

Statement of the environmental policy and its publication gives an opportunity to our management and employees to show our determination to fully implement, and familiarize to all interested parties, of which we expect to understand, and necessary support and cooperation, with the aim of giving a measurable contribution to the quality of life in an environment in which our organization operates.

Environmental policy will be revised, if necessary, after each regular review of the system of environmental management by the management.

Environmental policy is posted on the entrances and visible places in the organization and is binding for all employees.
